Such licenses are not transferable, i.e., once a user has purchased a personal license, he cannot transfer it to someone else. The license allows the user to use AutoCAD on a single computer. You can install the software on a variety of operating systems, such as Windows, Mac, and Linux. Professional license The Professional license enables a user to access the most powerful features and functions of AutoCAD by purchasing a single copy. The licenses are not transferable. Educational license The Educational license is a valuable tool for instructors, trainers and educational institutions. Educational licenses are offered in several configurations, and the most common license types are for college and university instructors and trainers who are instructors/trainer at a college/university. The Educational license allows multiple users to use AutoCAD on the same computer. The license can be shared by multiple users, and educational license holders can only use the software on a single computer.
